### OVERVIEW:

NATA's three day Quality Management in the Laboratory course is designed to provide participants with a strong understanding of the elements required for good practice in a laboratory.

This course is aimed at laboratory management and staff involved in the implementation, maintenance and improvement of the laboratory's management system. It is suitable for all levels of staff and is designed to provide an in-depth understanding of the laboratory's management system, including the technical requirements.

### WHO SHOULD ATTEND:

This course is aimed at laboratory management and staff involved in the implementation, maintenance and improvement of the laboratory's management system. It is suitable for all levels of staff and is designed to provide an in-depth understanding of the laboratory's management system, including the technical requirements.

Our teaching approach is centred on a workshop format that is highly interactive and utilises a mix of case studies, role plays and scenarios for effective learning. We can also present customised training courses specifically tailored for your organisation.

### LEARNING OUTCOMES:

The course will focus on these topics:

- Topic 1 - Introduction and Documentation
- Topic 2 - System Maintenance
- Topic 3 - External Relationships
- Topic 4 - People Management
- Topic 5 - Sample Management
- Topic 6 - Technical Management
